Welcome to Eudora!

Welcome to Eudora!
Eudora is now licensed in three ways: Sponsored Mode, Paid Mode, and Light Mode. Unless you change modes, Eudora will run in Sponsored Mode, meaning it will display ads.

We have done our best to present the ads in a way that respects the work you do in email. By allowing Eudora to display ads, you get the full power of Eudora for free and we can still pay our bills.

If you decide the ads are not for you, you can change modes. Paid Mode shows no ads. Current Eudora Pro 4.x users will be able to upgrade to Paid Mode for free. Other users will be able to pay a license fee to go to Paid Mode. At this stage in testing, the machinery for Paid Mode is not fully tested, and Paid Mode is unavailable. Light Mode also shows no ads, but has many fewer features.

To switch forms of Eudora, please use the "Payment & Registration" item in the Help menu. To learn more about the three modes, click on the "Tell Me More" button below

Fig. 15H

Persistent Ads

PlayList Request

faceTime Used to determine how much advertising
to send to client
eTimeLeft Not used

Client Info Response

reqInterval Relatively large: one or more days
flush Used. Single playlist completely specifies
list of ads client should have

Product Response Scheduling Parameters

showFormMax Not used

Fig. 16A

Short-Lived Ads

playList Request

faceTime Not used
faceTimeLeft Used to determine how many ads client
should receive

Playlist	Response	ClientInfo
----------	----------	------------

reqInterval Not used. Instead, client requests new playlist whenever ads "run low".
flush: Not used

Parameters

Parameters
showForMax: Used to determine how long an ad runs

We'd like to know how you use Eudora.

In order to make Eudora work as well as possible, it's important that we know how people use it. We ask users for this information at random. Looks like it's your turn. If you're open to helping us this way, all you have to do is click "Generate Info" below and a message will be created. You can review the contents of the message if you like, and then send it to us or not -- that's up to you.

We value our privacy; we're pretty sure you value yours. So we want you to know what we'll be collecting and give you a chance to eliminate anything you don't want to send. Simply uncheck the boxes next to any information you'd rather not send.

Please understand that as soon as we receive your email, we will throw away the headers that identify the mail as coming from you. You see, we don't actually need to know who you are to find your information helpful. So we promise to protect your privacy and turn you into "just a number." :-)

It's OK to transmit statistics regarding:

☒ Your demographic data

☒ Advertisment information

☒ Non-personal settings

☒ Your Net/Eudora usage

☒ Eudora features you use

* The list of available ads advantageously can be built from the following query:

```
ads = dbCon.prepareStatement("SELECT * FROM ads WHERE StartDate <= today AND endDate >= today + 30 AND
AdType = 'p' AND AdStatus = 'A' AND ImpressionsServed < Impressions ORDER BY ImpressionsServed
ASC);
run out ads = dbCon.prepareStatement("SELECT * FROM ads WHERE StartDate <= today AND endDate >= today +
30 AND AdType = 'R' AND AdStatus = 'A' AND ImpressionsServed < Impressions ORDER BY ImpressionsServed
ASC);
```

* The time required to deliver the ads advantageously can be calculated in the following manner.

```
face time left for today [seconds] = faceTime[today] - faceTimeUsedToday
```

(Comment: Face time left for today is the number of seconds the servlet can use to deliver special ads today.)

```
(Comment: Face time left for today is the number of seconds the servlet can use to deliver special ads today.)
```

```
predict face time [seconds] = SUN( faceTime[tomorrow], faceTime[tomorrow + 1], ... faceTime[tomorrow + reqInterval]
)
```

(Comment: Predict face time is the number of seconds the servlet predicts the user is going to have.)

```
goal show time left [seconds] = predict face time - faceTimeLeft
```

(Comment: Goal show time left is the number of seconds that the software provider needs to fill with ads.)

```

8 Targeting
  while (face time left for today ) {
    if ad is not in the history {
      select ad {according to target = today}
      face time left for today -= ad.showFor
    }
    next ad
  }

  while (Goal show time left ) {
    if ad is not in the history {
      select ad {according to target}
      goal show time left -= ad.showFor
    }
    next ad
  }

```

Default values:

- reqInterval = 1 day.
- faceTime = 30 minutes
- faceTimeQuota is ?
- histLength = 31 days
